## STUDENT ADVISORY COUNCIL

# Want a say in the future of #tech and #digitalmedia?

At the Digital Wellness Lab at Boston Children's Hospital and Harvard Medical School (The Lab), we conduct research and work across industries to develop evidence-based guidance to encourage technology leaders to build a healthier digital ecosystem for youth — and we want to include your voice!

**We're inviting high school students to apply to participate on our Student Advisory Council for the 2023-2024 school year.\***

This is an incredible opportunity for a select group of students to interact directly with researchers at one of the leading pediatric hospitals in the nation and academics at Harvard Medical School.

As a student advisor to the Lab, you'll have the opportunity to learn about the latest research on digital media and technology and its impact on young people, build your leadership skills, and contribute to important change initiatives.

- ✓ Meet peers from around the country to discuss what it's like to be a teen online in 2023 — the good and the bad
- ✓ Make recommendations for ways apps and platforms can be designed for healthier experiences
- ✓ Connect directly with leaders in the technology and healthcare industries
- ✓ Author content about digital wellness for young people and/or participate in deep-dive conversations about our research (optional)

## Applications due September 15, 2023
